

Dear Commission,

I agree with everything in The National Conference of Volunteer's Examiner Coordinators petition for rulemaking. When it is time to make a decision regarding this matter please take this into consideration.

1. General exam Element 2 and 3 written: upon passing of these elements, operators should be allowed General class operating privileges on all HF bands excluding the morse code portions of HF.

2. General exam Element 1 morse code receiving test: upon passing Elements 1, 2 and 3 operators should be allowed normal General class operating privileges on all the HF bands.

As for the Extra class license exam should be the same as mentioned previously above.

Thank you for taking the time to consider this.

Michael Lawson

Technician Class Amateur Radio Operator
